

Bias Power Supply

The Bias Power Supply provides a reliable source of low voltage for control and monitoring in support of its companion Firing Circuit and Regulator Boards. This two-board assembly is sold encased in a modular enclosure that is din rail mountable as shown in the picture below.

Specific Features

- Power On Green LED. The LED will be illuminated any time power is applied to the equipment.
- Low Voltage Indication Red LED. The LED will be illuminated any time a low voltage condition exists.
- Fault Indication. This LED is activated in the event of a low voltage condition.
- There are no adjustments on the bias supply.

Available Models

The PS01 Bias Power Supply is available in the models shown below.

Part Number	Input	Regulated Output	Unregulated Output	Optional Output
69.003A	115VAC, 60Hz	+15V, -15V	+24V	+5V
69.003B	230VAC, 60Hz	+15V, -15V	+24V	+5V
69.003C	115VAC, 60Hz	+12V, -12V	+24V	+5V
69.003D	230VAC, 60Hz	+12V, -12V	+24V	+5V
